

Key features of a Nui platform

Technology

- ✓ Nui is a fully configurable, cloud-based software platform that provides a transparent and safe option for both buyers and sellers.
- ✓ Using API protocols, our technology easily integrates into your internal systems, enabling straight-through processing.
- ✓ Receive push notifications via our mobile app. With Nui you can trade anywhere, anytime.

Security

- ✓ Our platform is hosted by Amazon Web Services, which means your data and information is always protected. Our internal processes are audited by KPMG on a regular basis.

Our clients

- ✓ We currently provide solutions for some of the world's largest producers and traders in the agricultural sector, including, Arla, Glanbia and Valio, among others.

"The introduction of HilmarConnect™ has revolutionized our sales process. Our customers now have far greater access to our products, and know that at any point in time they are paying the true market price for our products." – Travis Coffey, Director – Cheese Sales, Hilmar
